

Summary

Product designer specializing in high-stakes, data-heavy systems including clinical dashboards, regulated workflows, and enterprise platforms where a confusing interface has real consequences. 4+ years across healthcare, fintech, and SaaS, bringing research rigor and technical fluency to translate complex systems into experiences non-technical users can actually navigate.

Experience

Product Designer | Amida Technology Solutions | Washington DC, USA

June 2024 – Present

- Designed UX for an AI-driven VA disability mapping tool, converting LLM-powered medical code pipeline used to process 114,000+ veteran claims.
- Audited and redesigned HIPAA-compliant interfaces across 4+ Medicaid and Medicare data platforms including a data lakehouse, data intelligence tool, and interoperability layer.
- Built an enterprise healthcare design system across multiple regulated products, applying WCAG 2.1 AA standards, contributing to 40% faster cross-product UI delivery.
- Managed NC Medicaid program deliverables across 3–4 cross-functional teams, tracking timelines and driving stakeholder alignment.
- Developed 50+ marketing assets including landing pages, one-pagers, and product decks for technical and non-technical stakeholders; currently driving company rebranding initiative.
- Partnered with engineers and PMs in Agile workflows, shipping AI-assisted prototypes using Figma Make and Claude Code to accelerate design exploration and development handoff.

UI/UX Designer | Ungrammary Design | India

Dec 2022 – July 2023

- Designed user-centric experiences across 6+ projects in finance, e-commerce, and SaaS, delivering high-fidelity mockups, responsive components, and animated interactions.
- Delivered 200+ web and mobile screens for 6th Street UAE, an e-commerce platform serving 1M+ users, collaborating with PMs and engineers to align design with product requirements.
- Crafted mobile-first UX for D2C subscription products, reducing signup drop-offs by 22% through clearer flows and onboarding.
- Delivered high-conversion landing pages using UX writing, A/B testing, and heat map insights, improving lead conversion by 30%.

User Experience Designer | Shram.in | India

Dec 2021 – Nov 2022

- Designed end-to-end UX for a startup productivity and work management tool, translating user research and interviews into wireframes and high-fidelity prototypes that improved usability scores by ~20%.
- Optimized core user flows and task structures, improving workflow efficiency by ~25% and aligning product decisions with business goals.

Education

Indiana University – Purdue University

May 2025 | Indiana, USA

MS in Human-Computer Interaction

University Of Mumbai

May 2021 | Mumbai, India

Bachelor of Architecture

Skill

Product & UX Design

End-To-End Product Design, User-Centered Design, Information Architecture, Interaction Design, Complex & Regulated Product Design, Agile & Lean UX, Conversational UI Design, UX Metrics & Analytics

Research & Evaluation

User Interviews, Usability Testing, Heuristic Evaluation, Cognitive Walkthroughs, Maze Analytics, Journey Mapping, A/B Testing, Heatmap Analysis

Design Systems & Accessibility

Enterprise Design Systems, Atomic Design, Scalable UI Architecture, Motion & Micro-Interactions, Responsive Web & Mobile Design, Accessibility (WCAG 2.1 / 2.2 AA), Inclusive Design

Design & Prototyping Tools

Figma Make, Axure RP, Miro, Principle, After Effects, AI-Assisted Prototyping & Research – VO, Lovable, Cursor, ChatGPT, Claude, Perplexity, N8n Workflows

Collaboration & Handoff

Agile/Scrum Workflows, Cross-Functional Collaboration, Design-To-Development Handoff (Figma Inspect, Zeplin), Accessibility Testing (Stark, Axe DevTools), Usability Documentation

Selected Projects | MS HCI

- May 2025: Designed a personalized recommendation chatbot for students; received Honorable Mention Award for capstone project.
- April 2025: Led design for Polis Center data visualization tool enabling 50+ users; awarded 1st place in a university-wide competition.
- April 2024: Runner-Up, Black Heritage Design Competition for building an inclusive UX solution
